CAN'T DO THE WORK

It's too much to try to work every day against a constant, dull backache, or sudden darting pain in the small of the back. Be rid of it. Try Doan's Kidney Pills. Your neighbors recommend them. Ask your neighbor.

Jack Blankenship, foreman Construction Co., Plumb, St. Louis, says: "I have had the best of results through the use of Doan's Kidney Pills and can't recommend them too highly. I have a lot of exposure while on duty as foreman of a construction company and holding engines, together with the jarring, is what had a tendency to bring on my kidney trouble. There were times I had to give up work and go home and stay there, as I was just down with my back. Sharp, shooting pains darted all through my back and kidneys and the kidney secretions passed irregularly, containing a sandy sediment. I was in bad shape generally until I went to the Louisa Drug Store Co. and got three boxes of Doan's Kidney Pills. I began using this medicine and soon got over the trouble. Doan's fixed me up in good shape and I have never been bothered since."

FARMERS SHOULD RAISE MORE GOOD UTILITY HORSES

Federal Authorities State That Horses Are More Economical on Farms Than Motorized Tractors or Trucks—An Infusion of Thoroughbred Blood Gives Spirit, Vigor And Endurance To All Breeds

There is now a recognized "horse zone" where short hauls and frequent stops are necessary in both city and country into which the truck and tractor cannot enter and compete with the horse without loss to the merchant and the farmer. After a costly experiment the horse is coming into his own, displacing the motorized truck and tractor, particularly on the farm, where it has been conclusively demonstrated that there is economy in breeding a suitable type of horse for a varied agricultural service.

At a recent meeting in Chicago of the Horse Association of America, H. C. Taylor, Chief of the Federal Bureau of Farm Markets, presented some interesting figures, proving that horses are more economical in every field of operation on farms than the motorized tractor or truck.

Computed on 1921 feed prices, the cost of power per acre, according to the U. S. Department findings, is \$1.37 for plowing with horses as compared with \$1.72 with tractors; disking, 34c with horses and 55c with tractors; disking in combination, 32c with horses as against 50c with tractors; harrowing 18c with horses as against 30c with tractors; drawing hay loader, 32c with horses and 51c with tractors, and drawing grain binder, 31c with horses, 55c with tractors.

The value of mechanical motive power is clearly recognized by the Horse Association of America, but after a thorough nationwide inquiry, it has been shown that the enforced displacement of the horse in farm work has been expensive to the farmer and has increased the cost of living to every family in America.

The various State Agricultural Colleges, particularly in the central west, are stressing the point that horses should be bred for the definite qualities which stand the test of long, hard service, an infusion of thoroughbred blood giving spirit, vigor and endurance to the colder breeds.

George Lane, head of a \$1,000,000 live-stock ranch in Canada, in a recent letter to Wayne Dismore, Secretary of the Horse Association of America, said:

"I have crossed Thoroughbred sires on broncho mares; on high grade Clydesdale mares; on mares sired by Percheron stallions out of broncho dams; on mares that were 3/4 or 1/2 Percheron; and whenever I had a pure bred Percheron mare that would not settle to a Percheron sire, I bred her to a thoroughbred sire, and usually got such mares in foal, the result being a crossbred thoroughbred Percheron. We have bred the female produce resulting from these various crosses to both thoroughbred and Percheron sires, so that we have horses carrying various degrees of thoroughbred blood—from 1/4 to 3/4 bred from mares of various types and blood strains. From long experience in the use of such horses, and our actual breeding operations, I know that the thoroughbred cross on any draft mare increases quality, endurance, and length of life."

The manufacture of mechanical motive power already has caused an enormous drain upon our available labor resources, so that every time a farmer, or business man, buys a mechanical power unit which he does not absolutely need, he is simply bidding up the labor market against himself. Nor can the market for coarse grains be left out of consideration. The displacement of horses occurring in the years 1910 to 1920, destroyed an annual market for over 115 million bushels of oats, 70 million bushels of corn and 4 1/2 million tons of hay—more than the average total export per year on these items. The curtailment of city demand cuts off not only the outlet for surplus farm horses, but this great market for staple farm products.

ADELINE AND MT. ZION

On January 23, at 8 o'clock, the pale horse and its rider visited the home of Mrs. Tom Chadwick and claimed as its victim her loving son, Robert Adkins. Robert was born March 28, 1905, departed this life January 23, 1932, aged 16 years, 11 months and 3 days. To know "Bob" was to love him. He always had a kind word for everyone. He leaves to mourn his loss a dear mother, sister and father, Jay Adkins of Fallburg. The remains were laid to rest at the Harman graveyard near Newcomb. The writer extends greatest sympathy to the bereaved family in this sad hour of bereavement.
